

Sustaining All Life Mini Zines Tools for Climate Justice Organizing & Movement Building

1. Access the files [here](#). Decide if you want to make mini zines with or without borders. Select and open the folder.

2. Decide what quality of the images you are able to download and print. The high quality files are about 10-20 MB per file. Select and open the folder.

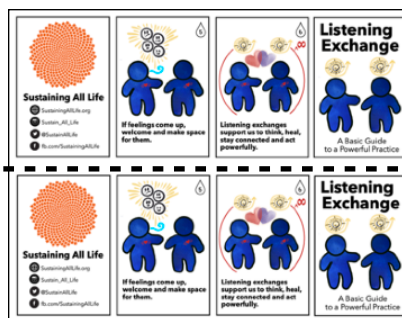

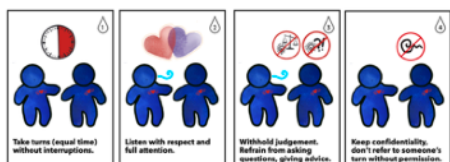

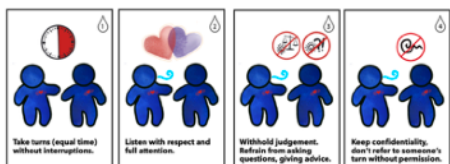

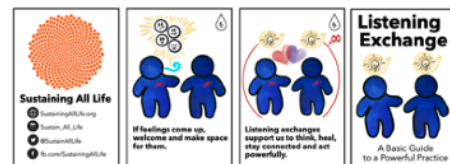

3. Decide which of the three mini zines you'd like to make. Download the file(s).

5. If you are able, print the file in full color, 100% the original dimension and have the two pages back-to-back. The two digital pages becomes one printed sheet.

7. Fold the mini zine like an accordion. See image above. There are eight total pages, the cover page is the front and SAL information page is the back.

4. Locate and open the file in your computer. There are two digital pages. Each page is 8.5" x 11" in dimension.

For the Emotional Aid Zine, each page is 8.5" x 14" in dimension.

6. Draw a light pencil line along the middle of the page (see image above) or fold the paper in half. Cut along the line. Each 2-sided printed sheet of paper makes two mini zines.

8. Enjoy sharing the zines with one or more friends. We'd love to hear your stories about how you're using them. Email us at SAL-art@rc.org.
